

TAQAT Company Profile 2022

TAQAT is Abilities & Results

About TAQAT:

Definitely, we are all indebted to Willis Carrier, the brilliant engineer who invented the air conditioner in 1902. Since then, the refrigeration and air conditioning systems sector has risen at an exponential rate, and after the worsening of the Ozone Layer Depletion catastrophe, it became a need rather than a luxury. This is especially true in health and educational facilities, civic centers, companies, and even residences. Thus, providing technical solutions for air cooling and purification became TAQAT's core business since the beginning. Energy is the secret to life, movement, and renewal, and our powers lie in the minds and forearms of our youth. TAQAT highlights the serious effort, the diligence, the ability, the development, the pursuit, the achievement, the responsibility, all the way up to the high quality that guarantees satisfaction. All these meanings interact together to achieve the 2030 vision for the Kingdom of Saudi Arabia. TAQAT is more than simply a corporate name; it represents a concept and philosophy. From the word TAQAT, we evolved our entity, vision, mission, goals, activities, and achievements. TAQAT Company was founded by Mr. Ali Alshehri in 2011, under registration number 5855045059, based in Khamis-Mushait, King Fahd Road, Kingdom of Saudi Arabia. TAQAT is a market leader with a long history of selling and maintaining different air conditioning systems for public, private, and individual clients. Furthermore, it provides engineering design, technical consulting services, and after-sale services to ensure conformity with standards.

Willis Carrier

**With your faith, we persevere
towards success,,,,,**
